EXPORT

Nowadays, dried fruit has been welcomed by people because of its delicious taste and attractive appearance, because in some seasons, the fruit of another season is not available, and you can use dried fruit instead, and it is very easy to carry because of its light weight. It is also very suitable for daily use and can replace harmful snacks.

Dried fruit has a very light volume compared to fresh fruit because it loses all its water in the production process and becomes a much smaller size that is more durable and can be stored and used for a long time.

Using modern knowledge, the most advanced devices and observing all hygiene principles, Mahan brand has succeeded in the first-class dry fruit production process so that our dear customers are fully satisfied with their purchase.

Today, all fruits are available in the dried fruit market, including: mango, banana, strawberry, apple, pineapple, fig, apricot, apricot, apple, cherry, persimmon, watermelon, apricot and other fruits that are in the package. Various types are produced.
